

Specialist

Stuttering, Cluttering & Fluency Disorders

The American Board of Stuttering, Cluttering & Fluency Disorders

"Being mentored through my certification process and then joining the community of board certified specialists have been the most rewarding experiences of my career. I have learned and grown in ways I could not have otherwise. I've connected with other speech-language pathologists who have a passion for working with people who stutter and been able to collaborate on exciting and meaningful projects."

Elyse Lambeth, CCC-SLP, BCS-SCF

Standard of Care

Promote the highest standards for training and therapy to impact positively the communication and thereby the lives of people who stutter, clutter, or have fluency disorders.

Specialists

Verify knowledge of stuttering, cluttering, and fluency disorders and mastery of clinical skills of professionals who seek and maintain the credential.

Advocacy

Build awareness of and appreciation for specialization. Advocate for people who stutter, clutter, or have fluency disorders and be a resource in communities.
